

The Exchange of Knowledge between the West German, Iraqi and Egyptian Intelligence Agencies

Initiative: Freigeist-Fellowships

Bewilligung: 10.12.2018

Laufzeit: 3 Jahre

What connections has the West German foreign intelligence agency maintained with Egypt's and Iraq's intelligence agencies in the past 50 years? And how have these international relations of intelligence between West Germany, Egypt and Iraq influenced the organisation form, rhetoric and practices of the three agencies under study? The specific case study is its coverage of the West German BND, Iraq and Egypt. It provides a systematic comparison, and investigation of relations, between the BND and one or two Arab agencies.
