

Market Design for Medical Supplies and Services: Corona and Beyond

Initiative: Corona Crisis and Beyond – Perspectives for Science, Scholarship and Society (beendet)

Bewilligung: 09.12.2020

Laufzeit: 1 Jahre 6 Monate

The project investigates the optimal design of procedures for the acquisition and allocation of scarce resources like medical supplies, hospital capacity, health workers, vaccines, etc. based on insights from market design. The project aims at providing practical guidelines on how to implement such procedures. The insights improve responses to the pandemic and inform optimal market design after the pandemic.
