

Scientific Experts and the Pressures of Pandemic Policy Advice

Initiative: Corona Crisis and Beyond – Perspectives for Science, Scholarship and Society (beendet)

Bewilligung: 08.12.2020

Laufzeit: 1 Jahre 6 Monate

This project analyses how scientific expertise and trust can be generated under conditions of deep uncertainty and urgency, as illustrated by the current Corona pandemic. It aims to develop a set of principles for guiding scientifically informed public debate and policy advice. Pooling the resources of philosophy of public health, philosophy of science, and social epistemology, the project fosters a critically informed public understanding of the science/public-policy interface.
