

Prof. Dr. Andreas Walther

Adresse*	Universität Mainz Fachbereich 09: Department Chemie A3BMS Lab: Adaptive, Active and Autonomous Bioinspired Material Systems Duesbergweg 10-14 55128 Mainz
Fachgebiet	Chemie
Spezialgebiet	Self-Assembly, Material Science, Bioinspired Materials, Polymers
persönliche Website	http://www.walther-group.com

Projekte

Molecularly Engineered Light-Adaptive Bioinspired Nanocomposites (extension)

Bewilligung: 09.04.2018

Molecularly Engineered Light-Adaptive Bioinspired Nanocomposites (extension)

Bewilligung: 09.04.2018

High-Performance reshapable bioinspired composite materials via dynamic supramolecular chemistry

Bewilligung: 31.03.2014

High-Performance reshapable bioinspired composite materials via dynamic supramolecular chemistry

Bewilligung: 31.03.2014

Treffen zur Vorbereitung des Vollantrages zum Thema "High performance reshapable bioinspired composite materials via dynamic supramolecular chemistry"

Bewilligung: 12.08.2013
