

Under the Radar: Changing Dynamics of multidirectional Science Communication in the Corona Crisis and Beyond

Initiative: Corona Crisis and Beyond – Perspectives for Science, Scholarship and Society (beendet)

Bewilligung: 08.12.2020

Laufzeit: 1 Jahre 6 Monate

Is science-based crisis communication becoming more participatory in the Covid-19 pandemic? If so, which dynamics are at work here: What is helping, what is hindering the process? Examining newspapers of record and other top-tier media alone seems insufficient to determine that question. Therefore, we focus on communication "under the radar," e.g. blogs of lesser-known scientists, online discussions on relevant Wikipedia articles, comments on publicly available preprints or changes in forms of cooperation in established citizen science projects.
