

Dual mode Participation - Window of Opportunity for Inclusive Real-world Labs (DuPa)

Initiative: Corona Crisis and Beyond – Perspectives for Science, Scholarship and Society (beendet)

Bewilligung: 09.12.2020

Laufzeit: 1 Jahre 6 Monate

During the first Corona lockdown situation, new digital practices in Real-world Labs have evolved. These niche practices open a window of opportunity to challenge the status quo of transformative research (local, face-to-face) and thereby overcome two key limitations of current Real-world Lab research: Lack of inclusiveness and local application versus global challenges. Therefore, the goal of this project is to develop dual-mode participation, combining classics such as serious gaming, self-experiments and scenario-workshops and new digital formats, to a stage that uses their full potential for more inclusive, translocal Realworld Labs.
