

## **Shelter in place? Improving the ethics of infection control measures in times of COVID-19**

Initiative: Corona Crisis and Beyond – Perspectives for Science, Scholarship and Society (beendet)

Bewilligung: 09.12.2020

Laufzeit: 1 Jahre 6 Monate

This project combines theoretical and conceptual ethical analysis with empirical research in the form of qualitative interviews with key stakeholders to generate a comprehensive ethics assessment within the discipline of public health ethics. With the help of an international team of world-leading public health ethics experts as partners, the project aims to improve the capacity for ethically sensitive decision making about non-pharmaceutical public health measures (such as social distancing, school closures, lockdowns).
